

PLUS EVO MONOBLOCCO HYBRID

High efficiency factory made hybrid system with monobloc hydronic heat pump for production domestic hot water, heating and air conditioning for medium users with or without solar thermal integration

Technical and construction characteristics

PLUS EVO MONOBLOCCO HYBRID is a factory made hybrid system for summer and winter air conditioning and for the production of domestic hot water composed of:

- Monobloc air/water heat pump outdoor unit with integrated external technical inertial storage tank (75 liter ATC model) equipped with motorized sanitary priority diverter valve. These units are equipped with double DC rotary inverter compressors, axial fans with brushless DC motors, source exchanger with finned coil with copper tubes and aluminum fins, user exchanger with brazed plates in AISI 304 stainless steel;
- Inertial accumulation of 315 liters of technical water, with inside a 4.54 m² finned copper rapid DHW exchanger;
- Back up modulating condensing boiler with dirt separator self-cleaning magnetic;
- DHW thermostatic mixing valve;
- High efficiency inverter electronic circulator to power the hydronic heating circuit;
- Microprocessor command and control panel for the system management with integrated Wi-Fi;
- 2.0 kW back-up electrical resistance, which can be activated in mode emergency or in integration mode;
- No. 2 expansion vessels (puffers) of 8 liters each;
- Manual filling group consisting of pressure gauge, tap and non-return valve;
- Safety valve calibrated at 3 bar;
- Automatic air vent jolly valve;
- External unit self-cleaning magnetic dirt separator;
- Hydraulic separator for the system circulators;
- Wheel kit to facilitate movement of the internal unit.

PLUS EVO MONOBLOCCO HYBRID, thanks to the use of a puffer equipped with a rapid finned copper DHW exchanger, it is able to deliver large quantities of domestic hot water without the need to carry out anti-legionella thermal shock cycles, in fact this innovative system uses the first in method - firsts out which guarantees maximum hygiene of the sanitary circuit, definitively eliminating the problem of limescale deposits.

This product can be combined with a forced circulation solar thermal system (optional) which acts as an integration for the production of DHW and for winter air conditioning.

The system can be equipped with a second inverter electronic circulator (optional) factory installed inside the storage unit to power a second air conditioning circuit. PLUS EVO HYBRID MONOBLOCK, is equipped with all the hydraulic components necessary for the correct functioning of the system, all installed and tested in the factory.

PLUS EVO MONOBLOCCO HYBRID

High efficiency factory made hybrid system with monobloc hydronic heat pump for production domestic hot water, heating and air conditioning for medium users with or without solar thermal integration

Application example PLUS EVO MONOBLOCCO HYBRID 7/24

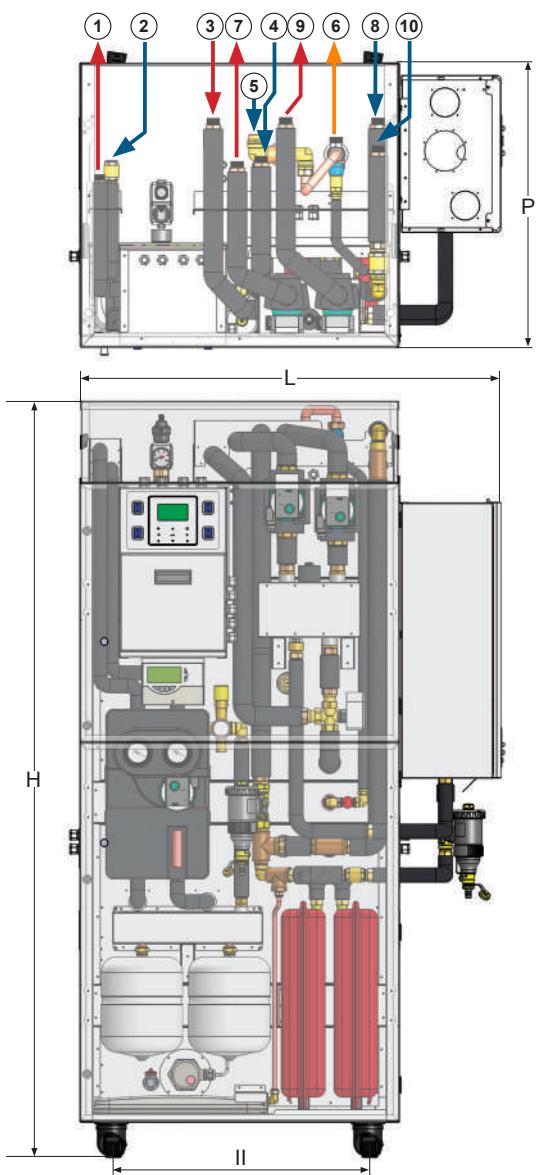

- 1 HPE EVO 7 external unit
- 2 Inertial accumulation of technical water (puffer) of 315 litres equipped with a 4.54 m² finned copper DHW exchanger
- 3 Domestic hot water delivery
- 4 Domestic cold water delivery
- 5 Electrical command and control panel
- 6 Technical water delivery 1st fan coil circuit
- 7 Technical water return to 1st fan coil circuit
- 8 "Y" mechanical filter
- 9 Aqueduct volumetric meter
- 10 Water network pressure reducer
- 11 Water network sand trap filter
- 12 Volumetric softener
- 13 Magnetic dirt separator
- 14 Inverter circulator 1st fan coil circuit
- 15 Inverter circulator 2nd fan coil circuit
- 16 1/2" F accumulation emptying tap
- 17 Safety group consisting of pressure gauge, valve air vent joker and 3 bar system safety valve
- 18 Water mains inlet
- 19 Digital solar control unit 0-10V CONTROL MULTI 06 S
- 20 UNIT 2 PLUS solar station
- 21 8 liter solar expansion tank
- 22 Supplementary electric resistance 2 kW
- 23 Jolly solar thermal air vent valve
- 24 BLUH+ / BLUHX+ solar collector

- 25 8 liter puffer expansion vessel
- 26 Motorized diverter valve to manage priority of domestic hot water production
- 27 Anti-scald DHW mixing valve
- 28 Vulcanized rubber anti-vibration base
- 29 1st fan coil system manifold
- 30 E.U. return hydronic line 1"
- 31 EU delivery hydronic line. 1"
- 32 Technical water delivery 2nd fan coil circuit
- 33 Technical water return to 2nd fan coil circuit
- 34 2nd fan coil system manifold
- 35 DHW recirculation pump
- 36 System filling group
- 37 6 liter system expansion tank
- 38 Inverter solar circulator
- 39 Forced circulation solar system safety group
- 40 24 kW modulating condensing boiler
- 41 Boiler self-cleaning magnetic dirt separator (standard)
- 42 Coaxial smoke evacuation duct 60/100 mm
- 43 Gas inlet G20 - G25 - G31
- 44 Return connection 1" F, U.E. HPE EVO 7
- 45 Delivery connection 1" F, U.E. HPE EVO 7
- 46 Hydraulic separator for secondary circulators
- 47 Electronic command and control unit
- 48 Self-cleaning magnetic dirt separator U.E. HPE EVO 7 (standard)
- 49 ATC inertial technical storage (standard)

Maximum heat output of the boiler in LPG gas heating	kW	20,0	24,0	32,0	34,5
Minimum thermal power in heating (80-60 °C) G20 methane gas	kW	2,5	2,5	3,3	3,3
Maximum thermal power in heating (80-60 °C) G20 methane gas	kW	19,2	23,7	31,3	33,3
Minimum thermal power in heating (80-60 °C) LPG gas	kW	2,5	2,5	3,3	3,3
Maximum thermal power in heating (80-60 °C) LPG gas	kW	19,2	23,7	31,3	33,3
Minimum thermal power in heating (50-30 °C) methane gas G20	kW	2,9	2,9	3,5	3,5
Maximum thermal power in heating (50-30 °C) G20 methane gas	kW	20,7	24,9	35,1	36,1
Minimum boiler heat output in heating (50-30 °C) LPG gas	kW	2,9	2,9	3,5	3,5
Maximum boiler heat output in heating (50-30 °C) LPG gas	kW	20,7	24,9	35,1	36,1
Supply pressure for boiler powered by G20 methane gas	mbar	20			
LPG gas boiler supply pressure	mbar	30/37			
Diaphragm diameter of boiler powered by G20 methane gas	mm	5,6	5,6	6,3	6,3
Diaphragm diameter of boiler powered by LPG gas	mm	5,6	5,6	6,3	6,3
Minimum CO2 emission from boiler powered by G20 methane gas		8,5%	9,3%	8,4%	8,5%
Maximum CO2 emission from boiler powered by G20 methane gas		9,5%	9,8%	10,6%	9,5%
Minimum CO2 emission boiler powered by LPG gas		10,0%	10,4%	10,5%	10,0%
Maximum CO2 emission from boiler powered by LPG gas		10,9%	10,7%	10,6%	10,9%
Minimum pressure of the heating circuit	bar	0,5			
Maximum pressure of the heating circuit	bar	3			
Useful thermal efficiency of the boiler at maximum power (60/80 °C)		95,8%	98,8%	97,1%	97,3%
Useful thermal efficiency of the boiler at maximum power (30/50 °C)		103,4%	103,7%	109,8%	104,5%
Useful thermal efficiency of the boiler at minimum power (60/80 °C)		90,0%	90,0%	95,7%	95,7%
Useful thermal efficiency of the boiler at minimum power (30/50 °C)		102,1%	102,1%	103,5%	103,5%
Useful thermal efficiency of the boiler at 30% of the load		109,8%	109,8%	110,7%	110,0%
NOx emission class		6			
NOx emission	mg/kWh	23	23	55	55
Fume temperature at max. power	°C	70,0	70,0	74,5	74,5
Max operating temperature in heating	°C	85,0			
Methane gas consumption at maximum flow rate in heating (1)	m³/h	2,08	2,54	3,37	3,55
LPG consumption at maximum flow rate in heating (1)	m³/h	0,64	0,75	0,97	1,35
Seasonal space heating boiler energy efficiency	%	92,0			
Useful efficiency at nominal thermal power. (high temperature) (2)	%	86,3	86,4	86,7	87,6
Useful efficiency at 30% of the nominal thermal power. (low temperature) (3)	%	96,4			
Heat loss in boiler stand-by	kW	0,069	0,069	0,071	0,069
Boiler annual energy consumption	GJ	11,0	42,2	62,7	103,4
Boiler seasonal energy efficiency class		A			
Expansion vessel volume	l	6		9	
Puffer delivery/return connections		3/4"			
G20/LPG methane gas inlet connection		3/4"			
Boiler condensate drain hose diameter	mm	22			
Coaxial smoke extraction duct diameter	mm	60/100			
Diameter of double rope evacuation ducts	mm	80			
Power supply		230V/1/50Hz			

(1) Value referred to the temperature of 15 °C external and 1013 mbar

(2) High temperature regime with 60 °C return and 80 °C delivery

(3) Low temperature regime 30 °C (return temperature at the boiler inlet)
